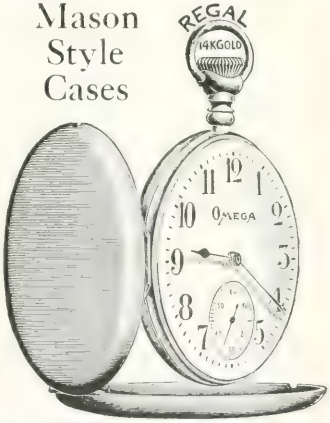
## Mason Style Cases



No. 1216 "Mason"

MASON STYLE CASES. The [illegible] shows the new "Mason" style case, which produces a beautiful 0, 12 and 16 size extra thin model case. The movement is held tightly in a movement ring of solid German silver. This "Mason" style 14k solid gold case meets the demand for a moderately priced solid 14k gold watch. The case is specially constructed with [illegible] 14k back, with snap open, which gives perfect protection to the movement, at the same time makes an attractive conduit in that 0, 12 or 16 size watch.

## IN THE TRENCHES

The "Omega" Military Strap Watch is continually proving its superiority under the most trying conditions.

Here's what Mr. Philip Theberge, of the Ellis staff, now in the trenches, says of his "Omega" Strap Watch:

(*Extract from Letter*)

"By the way, I wish to inform No. 1 Department that I still have the "Omega" Wrist Watch and have had no trouble with it so far, although it has been knocked around some. Almost every other watch in the company has been to the repair shop once or twice. Many of the boys, seeing its good qualities, have tried to buy one like it."

*Remember*—"OMEGA" is the "big watch" with the British, French, Belgian, Russian and Italian armies. It is the most popular watch in Europe.

## With the Artillery in South Africa

**The following letter from Lt.-Col. Hurdman, C.F.A., late commanding D "Special Service" Battery, in response to a request for information regarding the use of the OMEGA SAFETY MILITARY WRIST WATCH IN SOUTH AFRICA, illustrates the unique part it played in the late campaign and establishes its reputation as the "Standard" Military Timepiece.**

"Replying to your communication of the 24th inst., I may say that the information furnished you by one of my late non-commissioned officers is quite correct. Realizing the importance of having uniform time in a corps on active service, and having heard of the adoption of the Omega Wrist Watch by Continental Armies, I secured a dozen before leaving Canada and presented them to the Sergeants of the Battery on the voyage to Cape Town. The extremely rough usage entailed by so many months' service in a mounted corps was rather a severe test, particularly when the great extremes of heat and cold, the heavy rains and continuous sand-storms to which the troops were subjected are considered. These watches did service on the person of nearly every N. C. O. and man in the Battery, being transferred from one to the other on different duties, and gave general satisfaction. The dampness in some cases had rusted the outer cases through, but the works were not affected. The one I used during the whole campaign is still in perfect condition. I use it constantly for artillery purposes, and consider this watch to be an indispensable part of field equipment."

"The Watch of Matchless Merit"

General View of Omega Watch Factories at Bienne, Switzerland.
Production 900 to 1000 Watches a Day.

We consider the "OMEGA" Series to be the finest line of high grade movements on the American market to-day.

"OMEGA" Movements are made in all sizes from 9 Ligne to 18 Size and fit perfectly all standard makes of American cases.

"OMEGA" Movements are made in all grades from 7 to 23 jewels.

Every "OMEGA" Movement is rigidly tested before leaving the factory and is guaranteed to be a perfect timekeeper.

The "OMEGA" Factory is located at Bienne, Switzerland, in the very heart of the Swiss watchmaking district. The workmen are born and brought up in the watchmaking business and are exceptionally skilled in their trade. No watch factory in the world is more up-to-date in equipment or methods. In fact most of the intricate machinery in the "OMEGA" factory is specially designed and made in the "OMEGA" Machine Shops.

It is this combination of skilled workmen and efficient machinery that makes

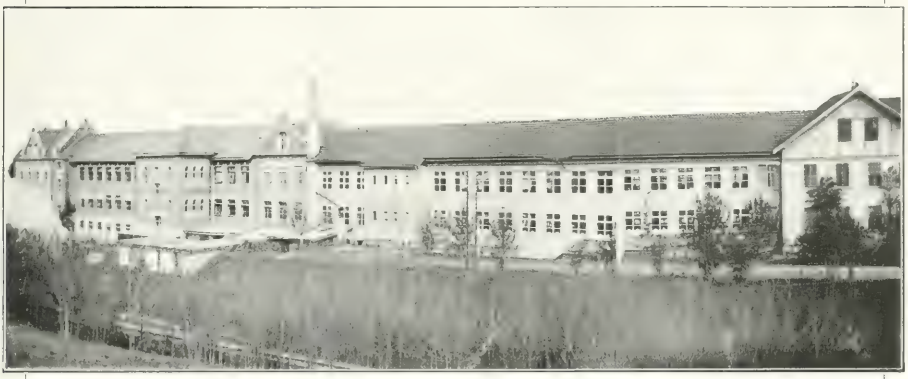
## "The Watch with the White Escapement"



The "Civic" Watch Factory

The CIVIC series is a new line of exceptionally reliable Swiss movements.

The CIVIC incorporates every modern feature that makes for good timekeeping.

The CIVIC introduces several new features that raise it high above the level of other watches that sell at the same price.

CIVIC Watches are non-magnetic, for the "WHITE ESCAPEMENT" is made of Ferro Metal—the metal that scientists have discovered to be absolutely non-magnetic.

CIVIC Watches are compensating. Their balance is not made of brass and steel, and cut as usual, but is compensating in itself, being made of white ferro metal. This ferro metal is absolutely unaffected by heat and cold, except in very extreme degrees. Thus in itself the CIVIC is adjusted to temperature.

Exposed winding wheels—polished bevelled teeth.

Movements are made in 7 and 15 jewelled grades—Jewels are carefully selected.

Solid three-quarter plates. The CIVIC is not a pillar movement. Plates are finely damaskeened.

Full headed movement screws.

Three adjustments.

Depressed centre and seconds, enamelled dial. The dial feet are fastened with side screws.

We carry a full line of Civic Factory-made interchangeable material in stock.

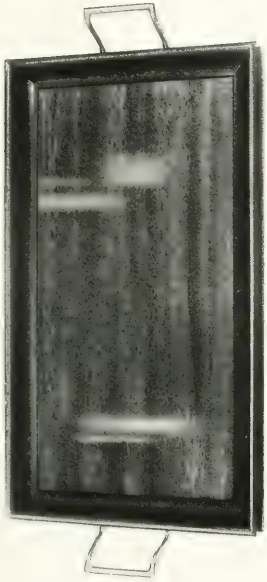
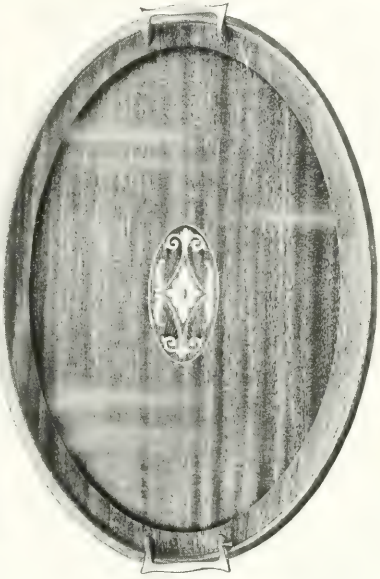
# MAHOGANY SERVING TRAYS

Catalogue illustrating 60 different designs, sent on request.



No. 0121SS.



No. 161S.

Every tray is guaranteed to be free from faulty material and workmanship.

Our mahogany trays are made from specially built up stock, selected mahogany faces, warranted not to split or warp.

Our trays are carefully finished in best shellac, hand rubbed to uniform dull finish to match the highest grade of furniture.

The inlay decorations are genuine marqueterie; hand sawed from rare woods and carefully fitted in place.

The glass in all our protected trays is double thick plate, and securely fastened in the frame by a cement that makes it waterproof, so that liquids cannot get under the glass. These glass protected trays are essentially for service and everyday use.

All trays are carefully packed in strong cartons and can safely be shipped by freight.

[illegible] Scarf Pin Cases Displayed [illegible] Necklet cases have loose bottom pads with strut to enable them to be used as easels; adjustable pins are supplied so the necklet and pendant can be gracefully arranged. Most of our naming is done from steel embossing dies, using suitable ink to match the goods or as a direct contrast; or, if desired, we stamp them in gold leaf with a hot type die. We cannot use special designed embossing dies for gold leaf work; much better and more artistic results are obtained from ink. We do not charge for embossing dies. Stamping of cases, 25c. per dozen. Our work is of the highest standard. Handy or Universal cases have cupped bottom pad.

Fittings of Scarf Pin, Link, Bracelet and Watch Bracelet are made suitable to carry the goods contained. Necklet cases have loose bottom pads with strut to enable them to be used as easels; adjustable pins are supplied so the necklet and pendant can be gracefully arranged. It is possible that we may be able to procure pearl push buttons, but at this moment there are only two sources of supply, and they are tied up with orders for this year, and are lacking material, labor and machinery to make them at a reasonable price. Most of the oyster pearl shells that reach this continent are being used for garment buttons. Most of our naming is done from steel embossing dies, using suitable ink to match the goods or as a direct contrast; or, if desired, we stamp them in gold leaf with a hot type die. We cannot use special designed embossing dies for gold leaf work; much better and more artistic results are obtained from ink. We do not charge for embossing dies. Stamping of cases, 25c. per dozen.
